

## Abstract

(I)

Compounds that may have anti-inflammatory activity are of general formula (I); wherein  $X_1$ , is H or  $COR_1$ , and  $X_2$  is H or  $COR_2$  but  $X_1$ , and  $X_2$  are not both H;  $R_1$  and  $R_2$  are the same or different and are each  $C_{1-4}$  alkyl substituted with  $R_3$ , or a four to seven-membered ring which can be optionally substituted with  $R_8$  and can contain one or more additional heteroatoms selected from O,  $S(O)_n$  and  $NR_9$ ; is  $R_3$  is F,  $CF_3$ ,  $OR_4$ ,  $NR_5R_6$  O,  $S(O)_n$   $R_7$ ;  $R_4$ ,  $R_5$  and  $R_6$  are the same or different and are each H or  $C_{1-4}$  alkyl optionally substituted with  $R_3$ , or  $NR_5R_6$  is a  $C_{4-6}$  heterocycloalkyl ring containing one or more heteroatoms selected from O,  $NR_8$  and  $S(O)_n$ ; each n is 0-2;  $R_7$  is  $C_{1-4}$  alkyl;  $R_8$  is as defined for  $R_3$  or  $C_{1-4}$  alkyl optionally substituted with  $R_3$  or halogen; and  $R_9$  is H or  $C_{1-4}$  alkyl; or a salt, solvate or hydrate thereof.
